Research Interests : I am attracted to the challenges that arise in machine learning when moving from the sandbox to the real world, primarily at the intersection of various pillars in trustworthy machine learning, including fairness, privacy, adversarial robustness, model compression, etc., focusing on uncovering the learning dynamics of neural networks.

Education

Université de Montréal (UdeM) | Quebec AI Institute (Mila)

COMPUTER SCIENCE, DOCTORATE | ADVISOR: PROF GOLNOOSH FARNADI

Sep 2023 - Present

National University of Singapore (NUS)

MASTER OF COMPUTING (AI SPECIALISATION) | ADVISOR: PROF REZA SHOKRI

Aug 2021 - Mar 2023

Indian Institute of Technology Delhi (IITD)

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING

Aug 2015 - May 2019

Work Experience

NATIONAL UNIVERSITY OF SINGAPORE (NUS) | RESEARCH INTERN

Jan 2023 - Apr 2023

ALVISUAL | AI ENGINEER (INTERN)

Jan 2022 - Mar 2022

ADVANCED DIGITAL SCIENCES CENTER (ADSC) | RESEARCH ENGINEER

Jun 2019 - July 2021

KRIDA.AI | ENGINEER (INTERN)

Jan 2019 - May 2019

WEALTHNET ADVISORS | ANALYST (INTERN)

Selected Projects

Training Non-Determinism and Group Fairness

OCT'21-NOV'22 | NATIONAL UNIVERSITY OF SINGAPORE (NUS)

- Investigated the impact of various sources of randomness in training neural networks on group fairness measures.
- Identified the high variance in group fairness measures as a result of the volatility of the learning process specifically for under-represented groups and analyzed the dominant source of randomness as the stochasticity of data order during training.
- Developed an approach to manipulate group-level accuracy (and model fairness) by creating custom data orders for training.

Lightweight Object Detection on Edge Devices

AUG 2020 - MAY 2021 | ADVANCED DIGITAL SCIENCES CENTER (ADSC)

- Designed a lightweight detection model that runs real-time (>30 FPS) on Jetson Nano. Featured on NVIDIA Jetson Forum.
- Scrutinized the practise of complete backbone transfer learning with empirical results, and proposed novel architectural components by exploiting multi-scale feature interaction to simultaneously improve accuracy and execution speed.
- Assisted with the design of a novel algorithm capable of executing parallelized low-bit convolutions in full-bitwidth multipliers.

Compressing Large-Scale Transformer-Based Models

JAN 2020 - JUN 2020 | ADVANCED DIGITAL SCIENCES CENTER (ADSC)

- Summarized the existing body of research on compressing Transformers, with a specific focus on the widely used BERT, providing an overview of the current state-of-the-art methods and techniques.
- Analyzed and categorized different compression methods, shedding light on their effectiveness and providing insights into their underlying mechanisms, and even clarified several best practices for compressing large-scale Transformer models.

Protection against Time Delay Attacks

JUN 2019 - JAN 2020 | ADVANCED DIGITAL SCIENCES CENTER (ADSC)

- Proposed a hierarchical LSTM capable of online processing to provide timely warnings in cyber-physical systems.
- Improved upon existing postmortem data-driven approaches by providing quicker predictions followed by gradual improvements with time for accurate and simultaneous detection and characterization of time delay attacks.
- Achieved $\sim 70\%$ decrease in prediction error against baselines with only $1/3^{rd}$ reaction latency and real-time protection.

Deep Learning in High Frequency Trading

MAY 2018 - JULY 2018 | WEALTHNET ADVISORS

- Proposed a hybrid LSTM with multi-context features to incorporate both short-term and long-term signals together in HFTs.
- Achieved $\sim 4\%$ boost in F-score against existing techniques, and integrated the pipeline into the company's trading module.

Restructuring Conversations for Zero-shot Abstractive Dialogue Summarization

FEB 2018 - MAY 2018 | IIT DELHI

- Proposed a zero-shot abstractive dialogue summarization that uses discourse relations to provide structure to conversations.
- State-of-the-art performance, with open-ended improvement possibilities as the underlying document summarizers get better.
